

JISHNU C R

Data Analyst | M.Sc. Data Science & Analytics

jishnucr9970@gmail.com · +91 9946189970 · Ernakulam, Kerala · [github.com/jishnucr](#) · [linkedin.com/in/Jishnu-cr](#)

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of internship experience delivering end-to-end analytics solutions using Python, SQL, Machine Learning, and Power BI. Built an AI-powered Business Intelligence Copilot with NLP querying, time-series forecasting, and customer segmentation — and a flood prediction model adopted in government disaster preparedness. Seeking a full-time Data Analyst role to drive data-driven decision-making at scale.

INTERNSHIP EXPERIENCE

Data Analyst Intern — Commissioner of Police, Ernakulam

June 2025 – November 2025 | Kochi | Python, YOLOv8, OpenCV, Power BI, Google Maps API

- Reduced peak-hour traffic congestion by ~20% by deploying a YOLOv8 vehicle detection pipeline across 10+ city junctions integrated with Google Maps rerouting.
- Built Power BI dashboards tracking real-time traffic KPIs, enabling data-driven decisions for city traffic operations.
- Conducted large-scale preprocessing and statistical analysis on multi-month CCTV video datasets using Python and OpenCV.

Data Analyst Intern — Tech Vitez International Pvt Ltd, Calicut

June 2023 – March 2024 | Calicut, Kerala | Python, SQL, Scikit-learn, Statsmodels, Power BI

- Achieved 15% accuracy improvement over baseline with a Random Forest + time-series flood prediction model — adopted by government for disaster preparedness planning.
- Analysed 100+ years of Kerala rainfall and flood data; EDA surfaced seasonal anomaly patterns and high-risk months.
- Designed Power BI dashboards visualising climate risk trends, presented to government stakeholders for policy planning.

PROJECTS | [GITHUB.COM/JISHNUCR](#)

Enterprise AI Business Intelligence & Decision Copilot | 2025

Full-stack AI BI platform with 8 analytics modules — Executive KPIs, Revenue, Profit, Customer Intelligence, Product, Regional, Forecasting, and AI Copilot. Natural language SQL Copilot answers plain-English business questions instantly. Prophet time-series model forecasts revenue 6 months ahead with confidence bounds. RFM engine automatically segments customers into Champions, Loyal, At Risk, and Lost cohorts.

Python | Plotly Dash | Prophet | LlamaIndex | LangGraph | DuckDB | Scikit-learn | RFM Segmentation

Data Engineering AutoML Pipeline | 2025

JishnuML — a custom Python AutoML library that automates data preprocessing, trains Logistic Regression, Decision Tree, and Random Forest models, and auto-selects the best-performing model by accuracy. Packaged via setup.py and published to GitHub.

Python | Scikit-learn | Pandas | NumPy | GitHub Packaging

Resume Screening Application — NLP | 2025

TF-IDF and cosine similarity pipeline that screened 500+ resumes, improved candidate shortlisting accuracy by 60%, and cut manual evaluation time from 2 hours to 30 minutes.

Python | NLTK | Scikit-learn | Streamlit

TECHNICAL SKILLS

Languages & DB	Python, SQL, R, PostgreSQL, MySQL
Machine Learning	Supervised Learning, Unsupervised Learning, Random Forest, Decision Tree, Logistic Regression, Natural Language Processing (NLP), Computer Vision, Time Series Analysis, AutoML, Predictive Analytics
Libraries & Frameworks	Pandas, NumPy, Scikit-learn, NLTK, SpaCy, Streamlit, OpenCV, YOLOv8, Plotly, Dash, Prophet, LlamaIndex, LangGraph, Statsmodels
BI & Tools	Power BI, DAX, Power Query, Advanced Excel, Jupyter Notebook, pgAdmin, DuckDB, Git, VS Code

EDUCATION

Master of Science in Data Science and Analytics

Jain University, Kochi

Bachelor of Computer Applications (BCA)

Calicut University — Moulana College

CERTIFICATIONS

- Data Analysis with Python — IBM
- Data Visualization — IBM
- Statistics for Data Science — Great Learning
- Advanced Excel, Power BI and SPSS — Jain University

AREAS OF INTEREST

Business Intelligence · Natural Language Processing · Computer Vision · Predictive Analytics · Climate Data Science · AutoML · Data Engineering
